

Schizophrenia Research Fund Established

Donations will help it grow

**“Sadly, I’ve seen a promising life end because of schizophrenia.
That’s why finding a cure is so important to me.
Accomplishing this will take research and that requires funding.
This endowment ensures researchers will have funding, not just today,
but for as long as it takes to conquer this devastating disease.”**

Andrea Kriluck Jordan, Ontario

In 2006, Andrea Kriluck created the Schizophrenia Research Fund at the Niagara Community Foundation. Her donation to this fund will be held in perpetuity with the annual proceeds supporting research into the cause, treatment and cure of schizophrenia. She created this fund to provide lasting support for schizophrenia research undertaken by the Canadian Psychiatric Research Foundation with the anticipation that others will contribute to it.

Can anyone donate to this fund?

Yes, this is an open fund. Anyone from anywhere may donate to it, knowing that his or her contribution of any size is joined with others’ gifts for maximum, lasting and perpetual charitable benefit.

Why are proceeds from this fund directed to the Canadian Psychiatric Research Foundation?

Ms Kriluck and the Niagara Community Foundation chose the Canadian Psychiatric Research Foundation because it works with organizations and individuals, like herself, to identify areas of research which specifically meets their interests. The Canadian Psychiatric Research Foundation is a national charitable organization founded in 1980. Its mission is to improve the well being of Canadians by funding mental health and addiction research. Since 1980, over 350 mental health researchers at 42 Canadian universities, teaching hospitals and research institutes have received funds from the Canadian Psychiatric Research Foundation.
